GRATITUDE AND CAMARADERIE

A time to celebrate with friends and
loved ones

www.unibuildro.com.ng

The Gift of Companionship and Support

Embracing Gratitude and Affection

It's February and this month let us all remember to show appreciation to our loved ones

Affection and Appreciation

Find you and your family's dream home with us as the perfect gift to show your affection and appreciation

Strengthening Our Bonds

February is the month to remember and cherish the bonds of friends, family, and spouses

What better investment is there than a home?

Partnership and Camaraderie

As always we are committed and dedicated to providing you with the best experience.

Stop by the office for a viewing of our latest developments.

Revving Up Exploring the World of Innovative Construction

Welcome to the world of Unibuildro

We are a design and build
company specializing in Luxury
building

Determine Your Needs

Determine Your Needs: Everyone needs a home. Unibuildro is dedicated to providing our clients with the best in Luxury housing

Research and Compare

Market research is an incredibly overlooked area of housing and house planning.

At Unibuildro we look into client satisfaction and base our properties off that satisfaction

Negotiate Price and Terms

At Unibuildro we aren't afraid to offer installment payments, this is done the up to first 10 months of completion

Set a Budget

Determine your budget for purchasing a house, considering both the upfront cost and long-term expenses such as insurance, maintenance, and repairs.

What Do we Do At Unibuildro?

Design and Build

We provide real estate development and architectural services

Engineering Design

We provide consultancy services and Engineering advice to those who need it, including other services like cost and quality control

Project Management

At Unibuildro we provide comprehensive project management services to our clients.

RISK ASSESSMENT

Why Assess Risk?

At Unibuildro Quality Control and Risk assessment are integral parts of the building experience and are taken before, during and after the building process to ensure nothing goes wrong during any of the stages of construction.

Comprised of two important aspects which are of course, risk identification and preventative measures.

Risk assessment is an integral of quality control which is why we take it so seriously.

At Unibuildro We use a variety of measure for risk prevention towards individuals and the structure itself.

Measures such as construction safety, measures in material and resource sourcing also contribute heavily to quality control and risk asesment

QUALITY CONTROL

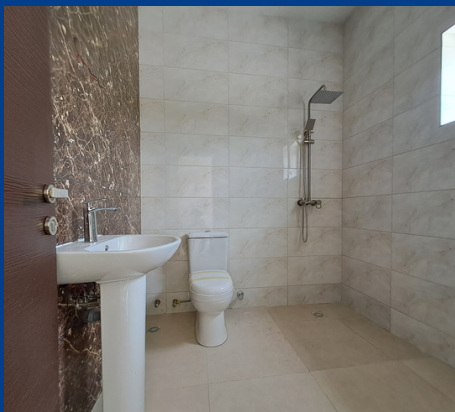

Why Quality Control

At Unibuildro Quality Control is Very Important and takes up an impressive amount of time during construction

Bad quality control can cause a lot of problems in the long run

Problems such as unsafe infrastructure as well as non compliance with standards, quality control is a must for any building company.

Risk assessment is an integral of quality control which is why we take it so seriously.

Why Check Tiles

Tile checking is one of the ways we quality control our buildings. You might wonder why we check the tiles.

Unibuildro checks the tiles after installation to determine if it's the right fit for the building.

In our Royal Daar apartment, we encountered some weak and hollow tiles that would have caused problems later down the line so with our Engineers we went to the appropriate floor and swiftly took care of it
